

Fine Cut Pad

Medium abrasive sponge for removing moderate weathering and scratches using the Fine Cut F6.01. The short height of 23mm creates low torsion forces, very good handling and the highest level of stability. The special density of the foam material enables long-lasting compression hardness during polishing. The optimised reticulation (open cellular structure) and cell count contributes to a high level of abrasiveness and excellent hygiene factors. The milling edge ensures extra flexibility for the pads, enabling them to fit around contours easier. The colourful non-woven material, suitable for polishing, ensures process safety. Compression hardness: 12. Abrasiveness: 5.
